Notch Cutting Machine foot operated

MORSØ Notch Cutting Machine NM is a foot-operated notch cutting machine for cutting window bars, mullions, and cabinet front frames requiring haunch joints.

MORSØ NM leaves the cut surface of the wood perfectly smooth and accurate, requiring no further preparation before joining. The horizontal movement of the knife block is stepwise adjustable.

The fences, left and right, with the adjustable stops ensure correct work. The special lever system of the machine ensures a very easy operation. Twin return springs automatically bring the knives back to starting position.

- a clean and constantly accurate cut will be produced with **MORSØ-NM**
- the **MORSØ-NM** produces no dust and therefore requires no extraction
- the **MORSØ-NM** require less than 15 minutes to change the cutting blades, to the set-up, and to the positioning of the stops.
- as the blades wear the 45 degree angle remains unchanged, ensuring consistently accurate joints.
- the **MORSØ-NM** cuts plastic, all kinds of wood including MDF

MORSØ-NM is delivered with:
safety quard, 2 sliding longitudinal stops, fences on both the right and the left side of the machine, 1 nose knife (size per request), 1 pair of side knives.
